

# Gas Service Sneath Lane Pipeline Replacement

## Quick Facts

- Upgrading gas pipeline
- No interruption of your gas service
- Traffic controls on westbound and eastbound Sneath Lane

---

## What is the work?

As part of PG&E's ongoing maintenance and safety plans, we will be replacing about 3,500 feet of existing 4-inch gas pipeline on Sneath Lane. We will deactivate the existing pipeline and install a modern, 6-inch plastic pipeline to upgrade the gas system serving your neighborhood. This pipeline replacement will enhance safety and improve service reliability to your neighborhood.

---

## What to expect

Whenever possible, a constant flow of traffic will be allowed in both directions on Sneath Lane. However, traffic may be reduced to one lane to ensure a safe work zone during some construction periods. Flagmen will be present to assist with safe traffic flow. All safeguards will be in place to ensure the safety of the public and our crews. There will be no interruption of gas service at your home or business.

---

## When will work take place?

Work is expected to begin during the week of October 22 and continue through April, 2013. Most work will occur Monday through Friday, 9:00 a.m. to 4:30 p.m. There may be some work on Saturday.

---

## Where will work take place?

Construction will take place in sections on the westbound side of Sneath Lane. Work will begin at the most westerly intersection of Claremont Drive and Sneath Lane, and continue east on Sneath Lane to Rollingwood Drive.

---

## Who will do the work?

PG&E crews and authorized PG&E contractors will be performing the work. These individuals will be wearing appropriate safety gear and identification.
